Dear Hiring Team,

With over 15 years of experience in data engineering, AI, and strategic leadership, combined with a PhD in Data Architecture, I have successfully led high-performing teams and driven large-scale data transformation initiatives across industries. I am excited about the opportunity to lead your Data & AI team, shaping strategy and execution to deliver impactful, business-aligned solutions.

As a Lead Solution Architect at PUMA, I have:

- Led and scaled cross-functional teams (10+ engineers, including 2 leads), improving PUMA.com system performance by 20%.
- Developed AI-powered frameworks to optimize software engineering efficiency and automation.
- Founded an internal technical governance initiative, ensuring strategic alignment across stakeholders.

Additionally, my doctoral research in data architecture led to the invention of The Basin Network, a framework for enhancing AI/ML interoperability across enterprises—a challenge that closely aligns with the need for robust, scalable, and governed Data & AI ecosystems.

I am eager to bring my technical expertise, leadership experience, and strategic vision to your organization, fostering collaboration, innovation, and efficiency in your data and AI initiatives. I look forward to discussing how I can contribute to your team's success.

Best regards,

Nasr Kasrin, PhD
